	<b>Gelinnov (LASERSON)</b>	<b>1.50</b>	<i>Sodium Polyacrylate (and) C18-C21 Alkane (and) Trideceth-6</i>
	Cremophor CO 410 (BASF)	2.00	<i>PEG-40 Hydrogenated Castor Oil</i>
	Roselle AF 26051 (RAVETLLAT)	0.20	<i>Fragrance</i>
B	Deionized water + preservative	qs 100	
	Edeta B powder (BASF)	0.10	<i>Tetrasodium EDTA</i>
	Propylene Glycol Care (BASF)	2.00	<i>Propylene Glycol</i>
	Hyaluronic acid, Na salt, 1% solution (1961475) (CPN)	0.50	<i>Water (and) Sodium Hyaluronate</i>

#### Procedure :

- Prepare and stir phases A and B.
- When the two phases are homogeneous, add phase B to phase A.
- Stir until homogeneous (for about 15 min), then adjust pH to 5.5 – 6.5.

#### Properties :

- pH = 5.5 – 6.5
- Viscosity (20°C) : 63 000 cP (spindle 6, speed 5, Brookfield RVDV-I+)

**Stability** : Stable to centrifugation during 4 times 15 min at 4000 rpm (Sigma 1-6 brand).

LASERSON has the worldwide rights for GELINNOV.

This formula is given for information only and is to be used solely for the purposes of presenting our products within a formulated environment. In this respect no toxicological, bacteriological or other evaluations have been performed and there has been no search for any possible patents. Our technical and commercial information is provided for information purposes only without any guarantee and is based on our knowledge when drafted and particularly on the data communicated by our suppliers. Our products are exclusively reserved for warned professionals fully enabled to evaluate their risks and having acquired all necessary knowledge and know-how to use them in a suitable way in conformity with applicable laws, regulations and patents in force, such professionals strictly remaining the only persons liable for such use; any buyer acknowledges it and approves it when ordering. In case of resale of products by any of our clients, we shall bear no liability towards any subsequent sub-purchaser.
